CFSA

CFSA — Learn Cybersecurity Through Real-World Practice

100%

Hands on labs

**Certification
Included**

**3-5 weeks
Duration**

100%

Placement Support

Hands on cybersecurity training designed to take you from beginner to job-ready with practical labs, real-world simulations, and expert mentorship.

01. What is **CFSA**?

CFSA is Flicker Security's entry-level cybersecurity certification crafted for students, beginners, and freshers looking to build a solid foundation in cyber defense. This program blends conceptual clarity with practical exposure, helping you understand how real-world attacks work, how defenders respond, and how to begin your journey into network and application security.

Whether you're preparing for your first SOC role, bug bounty journey, or simply want to explore cybersecurity, **CFSA** gives you the **confidence, skills,** and **certification** to step forward.

2. Who Should **Enroll**?

- **Students & Freshers** - BCA, BTech, MCA, BSc, MSc students looking to enter cybersecurity with a strong foundation.
- **Career Switchers** - Beginners from non-technical backgrounds pivoting into IT security no prior coding required.
- **Final-Year Students** - Students preparing for placements who want a validated cybersecurity credential on their resume.
- **SOC / Helpdesk Aspirants** - Entry-level professionals aiming for SOC Analyst or IT Helpdesk roles needing structured training.
- **Bug Bounty Starters** - Aspiring ethical hackers who want web application security basics before their bug bounty journey.
- **IT Professionals** - Working professionals in IT or networking who want to upskill into cybersecurity operations.

03. Complete **Module** Breakdown

7 carefully designed modules blending theory with hands-on lab work covering what actually matters in industry.

01. Networking Fundamentals

- OSI & TCP/IP Models
- IP Addressing, Subnetting, VLAN, NAT
- Routing Basics, VPN, Proxy
- Firewall concepts and basic configurations

02. Network Security Essentials

- IDS/IPS — Intrusion Detection & PreventionIP
- Packet analysis with Wireshark
- Network sniffing, scanning, enumeration
- Common attacks: MITM, ARP spoofing, DoS basics

03. Web Application Security

- Introduction to OWASP Top 10
- Hands-on: XSS, SQL Injection, IDOR, CSRF
- Web proxies: Burp Suite Community Edition
- Basic reporting and mitigation strategies

04. Cryptography Fundamentals

- Symmetric vs Asymmetric Encryption
- Hashing algorithms: MD5, SHA, etc.
- SSL/TLS basics and HTTPS analysis
- Real-world use cases of cryptography in apps

05. SOC Overview with Azure Sentinel

- What is a SOC? Roles & Responsibilities
- Introduction to SIEM and Azure Sentinel
- Log sources, dashboards, basic KQL queries
- Creating basic alerts and incident triage

06. Tools & Techniques

- Nmap scanning and enumeration techniques
- Netcat for network communication & probing
- Wireshark packet-level analysis
- Burp Suite for web application interception

07. Introduction to Incident Response

- IDS/IPS — Intrusion Detection & PreventionIP
- Packet analysis with Wireshark
- IDS/IPS — Intrusion Detection & PreventionIP
- Packet analysis with Wireshark

4. What You **Get**

- **Hands-On Labs** - Real practical labs for every module Wireshark packet analysis, Burp Suite web attacks, Nmap scanning & more.
- **SOC Simulations** - Live SOC environment with Azure Sentinel experience what real analysts do daily in a security operations center.
- **Industry Certificate** - Receive the CFSA certification from Flicker Security a credential validated by practicing SOC professionals.
- **Mentor Support & Doubt Sessions** - Direct access to mentors with OSCP, CEH, PNPT credentials. Regular doubt-clearing sessions included.
- **Career Guidance** - Post-training mentorship, resume building, interview preparation, and placement assistance included.

5. Roles You Can **Target**

SOC Analyst Tier 1

Network Security Associate

Ethical Hacking Trainee

Security Analyst

Bug Bounty Hunter

IT Helpdesk + Security

Security Operations Intern

CFSP (Advanced Upgrade)

After CFSA, continue your journey with **CFSP — Certified Flicker Security Professional** designed for SOC analysts mastering threat hunting, incident response, cloud security & red teaming.

6. Trained by **Certified** Experts

Our training team holds globally recognized certifications bringing real industry experience into every session.

OSCP	PNPT	CEH
CISSP	CCNA	eWPT
eCPTX	AWS Security	AWS Solutions Architect
AZ-500	SC-200	SC-300
SC-900	ISC2 CC	BTL1 & BTL2

7. What Our **Students** Say

Real feedback from people who trained with Flicker Security now working at top companies.

★★★★★

As someone new to cybersecurity, I was initially overwhelmed. After completing this training, I feel well-equipped to handle a variety of security challenges. The curriculum was beginner-friendly yet detailed enough to keep advanced learners engaged. Highly recommended.

UK Uttam Kumar Singh
Senior SOC Analyst - HCLTech

★★★★★

The course exceeded my expectations. I appreciated the emphasis on ethical hacking and the chance to practice real-time cyber attack simulations. The faculty were always approachable and supportive. A great choice for anyone breaking into cybersecurity.

MC Mansi Chaurasia
SOC Analyst - HCLTech

One of the best decisions I made for my career. The sessions were interactive and gave me a deeper understanding of cyber threats. Instructors used tools in high demand in industry. The commitment to staying current with trends made this truly valuable.

RK Ranu Kumar
Pre-Sales Executive · Microsoft

A transformative experience. The course covered everything from network security basics to penetration testing techniques. The hands-on labs were particularly useful. Thanks to this training, I secured a position as a security analyst. Highly recommended.

SC Sudeep Chatterjee
System Engineer · TCS

Transparent Pricing

One plan, no hidden costs. Everything you need to get certified.

CFSA CERTIFICATION PROGRAM

~~₹ 30,000~~

₹ 15,999

One-time payment · Lifetime access to materials

YOU SAVE ₹14,001 — 47% OFF

- ✓ All 7 Core Modules — Complete Curriculum
- ✓ Live Sessions
- ✓ Hands-On Labs & Practical Assignments
- ✓ SOC Simulation with Azure Sentinel
- ✓ Industry-Recognized CFSA Certificate
- ✓ Mentor Support & Doubt Sessions
- ✓ Career Guidance & Interview Prep
- ✓ Resume Building Assistance

UPCOMING EVENT

New Age Ethical Hacking Webinar

Master modern offensive security, AI-driven cyber threats, red teaming concepts, SOC attack simulations, phishing analysis, cloud security basics, and real-world ethical hacking workflows.
